RICE ranking

score = reach x impact x (confidence / 100) / effort. **Reach and effort are assumptions**, listed below.

Rank	Fix	Reach	Impact	Conf.	Effort	Score
1	Single source of truth for eligibility criteria and loan limits (one config feeds product page, eligibility page, calculator, splash)	80,000	0.5	80%	0.5	64,000
2	One fee statement everywhere: align the hero, EMI table and benefit copy, and state the fee range and when each applies	60,000	1	50%	0.5	60,000
3	Show the application pop-up only after the cost and eligibility sections are read, or not on those sections	60,000	0.25	50%	0.25	30,000
4	State time claims by stage (approval, disbursal) and use one set on every screen	60,000	0.5	50%	0.5	30,000
5	Show APR, fees and total cost in the calculator output, not only EMI and total interest	70,000	1	50%	1.5	23,333
6	Put the consent checkbox next to the mobile-number field, split T&C from KYC-data consent, and state the purpose	40,000	0.5	50%	0.5	20,000
7	Fix the eligibility calculator's default state: start empty, and validate when obligations exceed income	15,000	0.25	80%	0.25	12,000
8	Show the same stages on the page and in the application (one step model)	40,000	0.25	50%	0.5	10,000
9	Show an indicative eligibility range and rate band before the mobile-number gate (the bet to test)	40,000	2	50%	4	10,000
10	Open the Schedule Of Charges link on the Loans tab with Personal Loan selected	10,000	0.25	80%	0.25	8,000

Assumptions behind each row

1. Single source of truth for eligibility criteria and loan limits (one config feeds product page, eligibility page, calculator, splash)
Reach: ASSUMPTION: 80% of 100,000 quarterly journey starts read the eligibility text on the product or eligibility page (replace with funnel data)
Effort: ASSUMPTION: person-months; copy plus one shared config, compliance review of wording
Friction points: F-08;F-11

2. One fee statement everywhere: align the hero, EMI table and benefit copy, and state the fee range and when each applies
Reach: ASSUMPTION: 60% of starts scroll far enough to see both the hero claim and the EMI table
Effort: ASSUMPTION: person-months; copy change plus compliance sign-off, no new service
Friction points: F-01

3. Show the application pop-up only after the cost and eligibility sections are read, or not on those sections
Reach: ASSUMPTION: 60% of starts see the pop-up (it appeared on both page loads in the walkthrough)
Effort: ASSUMPTION: person-months; marketing-tool rule change. Impact is low because the pop-up may itself drive clicks
Friction points: F-07

4. State time claims by stage (approval, disbursal) and use one set on every screen
Reach: ASSUMPTION: 60% of starts see two or more of the conflicting time claims
Effort: ASSUMPTION: person-months; needs Operations to confirm stage timings
Friction points: F-05;F-06

5. Show APR, fees and total cost in the calculator output, not only EMI and total interest
Reach: ASSUMPTION: 70% of starts touch the calculator
Effort: ASSUMPTION: person-months; calculator change, APR computation shared with the KFS logic, compliance review
Friction points: F-09

6. Put the consent checkbox next to the mobile-number field, split T&C from KYC-data consent, and state the purpose
Reach: ASSUMPTION: 40% of starts tap Apply and reach the first data screen

Effort: ASSUMPTION: person-months; screen change plus Legal and Compliance wording review
Friction points: F-04

7. Fix the eligibility calculator's default state: start empty, and validate when obligations exceed income
Reach: ASSUMPTION: 15% of starts open the separate eligibility calculator
Effort: ASSUMPTION: person-months; front-end change
Friction points: F-12

8. Show the same stages on the page and in the application (one step model)
Reach: ASSUMPTION: 40% of starts reach the application splash and progress bar
Effort: ASSUMPTION: person-months; copy and progress-bar change
Friction points: F-06

9. Show an indicative eligibility range and rate band before the mobile-number gate (the bet to test)
Reach: ASSUMPTION: 40% of starts tap Apply or Check your eligibility
Effort: ASSUMPTION: person-months; pricing and eligibility service without a bureau call, design, compliance, instrumentation
Friction points: F-03;F-02;F-12

10. Open the Schedule Of Charges link on the Loans tab with Personal Loan selected
Reach: ASSUMPTION: 10% of starts follow the charges link
Effort: ASSUMPTION: person-months; link parameter and default tab
Friction points: F-10

Robustness

Reach and effort moved by up to +/-30%, 2,000 draws: Single source of truth for eligibility criteria and loan lim... #1 in 56%; One fee statement everywhere: align the hero, EMI table and ... #1 in 43%; Show the application pop-up only after the cost and eligibil... #1 in 0%; State time claims by stage (approval, disbursal) and use one... #1 in 0%
